Executive Summary

This report summarises the Q1 2024 performance of Project Alpha, a multi-agent AI data pipeline initiative. The project has processed over 2.5 million rows of retail transaction data across 15 stores nationwide. Total infrastructure spend was 47,500 GBP against a budget of 52,000 GBP.

Key Decisions Made

1. Approved migration from legacy data warehouse to cloud lakehouse by 31 March 2024
2. Signed off on 3-year Snowflake Enterprise contract worth 120,000 GBP
3. Hired 2 additional data engineers - offers sent to candidates

Action Items

- Alex Morgan: Complete Knowledge Graph POC by 28 February 2024
- DevOps Team: Grant Data Factory Reader role by 20 January 2024
- Finance: Process invoice INV-2024-0042 for 8,750 GBP by 31 January 2024
- Legal: Review Snowflake contract terms by 25 January 2024
- Product Team: Sign off on Pipeline Health Hub requirements by 15 February 2024

Financial Summary

Q1 Budget: 52,000 GBP
Q1 Actual Spend: 47,500 GBP
Variance: +4,500 GBP under budget
Projected Q2 Spend: 61,000 GBP

Risks & Compliance

- GDPR: Customer transaction data contains PII - loyalty account IDs and email addresses
- Contract risk: Snowflake auto-renewal clause requires 90-day notice period
- Data retention: Logs older than 7 years must be purged per policy by 28 February 2024
- Access control: 3 service principals have excessive permissions - review required
